

Maximize your cloud compute savings and minimize long-term commitment risk

Overview

ProsperOps automates the management of Amazon Web Services (AWS) discount instruments to help you save money, mitigate risk, and streamline cloud financial operations.

Even though AWS provides multiple financial tools to help reduce spend, each tool has different trade-offs and it's easy to end up with too much or too little commitment when your needs change.

Our intuitive, fully autonomous cost optimization platform automatically blends Savings Plans and Reserved Instances (RIs) to maximize your compute savings while minimizing long-term commitment risk.

With ProsperOps, you can automatically achieve savings of 40+% (placing you in the top 2% of AWS optimizers) with shorter commitments that dynamically adapt to usage changes in real-time. Discover why some of the world's most innovative companies trust ProsperOps.

Why ProsperOps

- Fully automated, real-time compute discount management—24x7
- Generate recurring savings outcomes with zero ongoing effort
- Reduce long-term commitment risk while maximizing discount coverage and utilization
- Easy to setup—no changes to architecture
- No risk to infrastructure and no access to your confidential data
- AWS ISV Accelerate Partner, SOC II Certified, and more

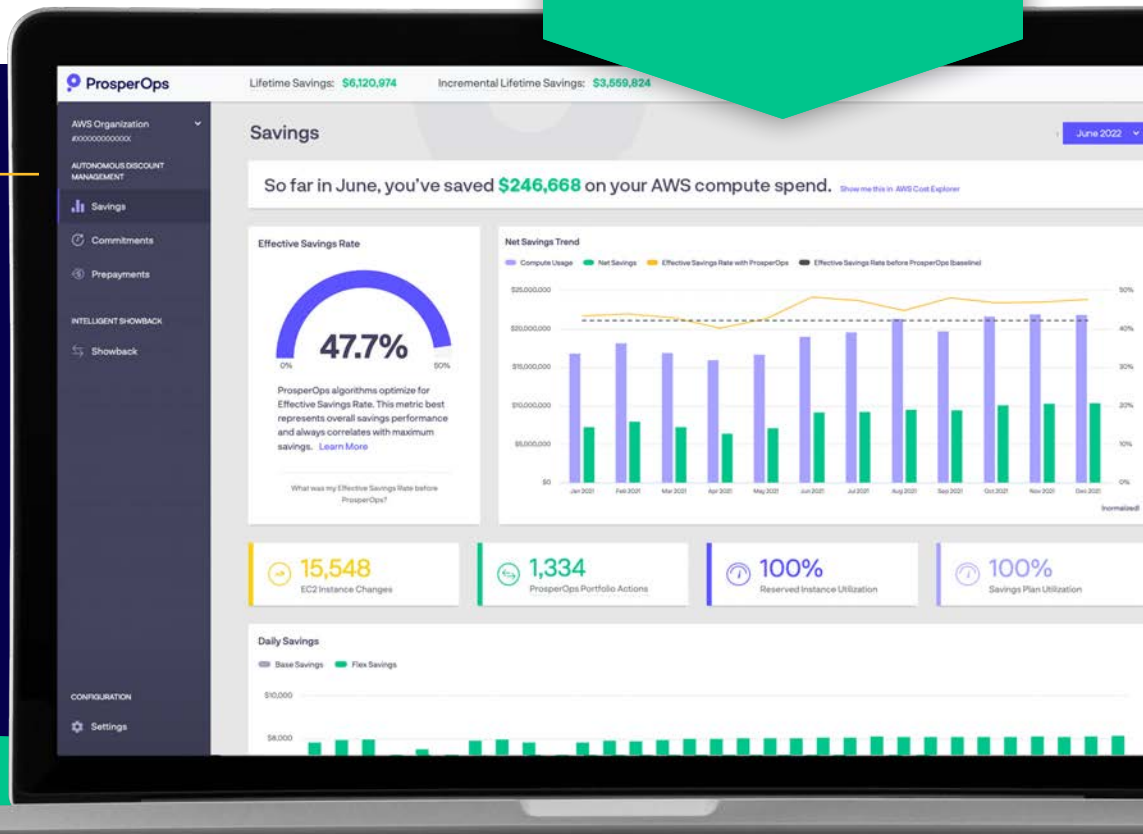

Key Features

Autonomous Discount Management

ProsperOps autonomously manages and optimizes your portfolio of discount instruments (e.g., Savings Plans and Reserved Instances) using real-time telemetry to maximize coverage and utilization.

Intelligent Showback

Accurately allocate commitment costs and savings across individual regions, resources, and more based on actual usage. Help product and internal teams discover the true unit economics of running in the cloud.

Benefits with ProsperOps

Seamless implementation
ProsperOps easily assumes management of any existing RIs and Savings Plans.

Proven strategy
Align and optimize commitments to consistently generate industry-leading savings.

Configurable controls
You control the knobs that manage risk and govern our actions.

Advanced optimization
Algorithms determine the ideal portfolio to maximize savings and minimizes financial lock-in.

Autonomous execution
Set it and forget it. Hands-free and real-time execution of all optimization activities.

Visualized outcomes
Access to commitment and financial KPIs to understand and track performance.

Roughly half (48%) of our customers enjoy an increase of 10x (or more) in their Effective Savings Rate.

Fidelity for FinOps.

Gain deeper visibility into the true unit economics of running your company in the cloud.

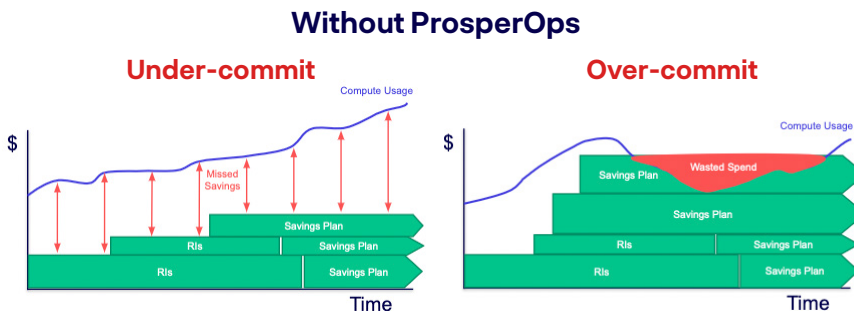

ProsperOps replaces spreadsheets and scripts with intelligent reporting and AI-powered cost optimizations that simplify FinOps and automatically deliver material savings back to your bottom line.

Freedom for DevOps.

Allow engineers to focus on building better products without worrying about over- or under-committing.

ProsperOps automatically maintains high coverage and perfect utilization, replacing hours of manual cost optimization tasks with AI that aligns discount instruments to your usage in real-time, 24x7.

First-class outcomes for everyone.

About ProsperOps

ProsperOps is the leading AIOps platform for cloud financial management. Founded in 2018, ProsperOps delivers a simple, fully autonomous cost optimization solution for AWS. By algorithmically managing AWS discount instruments (e.g., Savings Plans, Reserved Instances) ProsperOps maximizes your compute savings, minimizes commitment risk, and provides valuable insights for FinOps professionals.
